PEDRO GABRIEL CAIRES

Fullstack Web Developer

PERSONAL SUMMARY

Hello world! My name is Pedro Gabriel and I'm a Fullstack dev with specialization in PHP/Laravel

MY STORY

I started programming when I was 16, I've always been a hardware and software lover, when I started to attend the Technician School in Computer Science it was a big definitive push into the area. In 2020, along with two long time friends, I created Phog Tech, a freelance team specialized in Web solutions. After that I participated in several Open Source projects and now I currently work at I'M Labs, a company of diverse technological solutions. I stand out for my agility with new technologies and the ease of solving problems.

SKILLS

- PHP (Laravel, Lumen, Symphony & others)
- Javascript (Node.js, Vue.js, React.js)
- MySQL (and other relational databases)
- Semantic HTML, CSS, CSS/SASS
- Python
- Java
- React Native
- Docker
- AWS (and other cloud solutions)
- Intermediate English

EDUCATION

- "Curso Técnico em Informática" at Eniac College (2019~2021)
- College in Information Systems at FIAP (2022~Present)

EXPERIENCE

PHOG TECH

PHP Back-End Developer (2020~2021)

I was responsible for structuring and developing all database part of the projects that the team was hired. During this period I learned a lot about PHP as a language itself and how MySQL databases worked.

I'M LABS

Fullstack Developer (2021~Present)

An excellent opportunity in which I was exposed to several new and different technologies, I could test a little bit of everything and it was the period that I am learning the most in my life. I made several projects with ViteJs, Next, Laravel/Jetstream and other technologies. In the last few months I have been working mostly with Laravel, which has become my main technology.

NOTABLE PROJECTS

 - **Lotopower:** Lottery tips and simulations platform, made 100% by me in Laravel.
LINK: https://lotopower.com.br

 - **dumpi-fy:** Spotify playlist manager made in PHP.
LINK: https://github.com/dgtyPedro/dumpi-fy
