PEDRO GABRIEL CAIRES

Fullstack Web Developer

PERSONAL SUMMARY

Hello world! My name is Pedro Gabriel and I'm a Fullstack dev with specialization in PHP/Laravel

MY STORY

I started programming when I was 14, I've always been a hardware and software lover, when I started to attend the Technician School in Computer Science it was a big definitive push into the area. In 2020, along with two long time friends, I created Phog Tech, a freelance team specialized in Web solutions. After that I participated in several Open Source projects and now I currently work at Simbiose Social, a social tech company. I stand out for my agility with new technologies and the ease of solving problems.

SKILLS

- PHP (Laravel, Lumen, Symphony & others)
- Javascript (Node.js, React.js, Vue.js)
- MySQL (and other relational databases)
- Semantic HTML, CSS/SASS
- Python
- Java
- React Native
- Docker
- AWS (and other cloud solutions)
- Advanced English
- Scrum/Kanban (and other agile methodologies)

EDUCATION

- "Curso Técnico em Informática" at Eniac College (2019~2021)
- College in Information Systems at FIAP (2022~Present)

EXPERIENCE

PHOG TECH

PHP Back-End Developer (2020~2021)

I was responsible for structuring and developing all back-end of the projects that the team was hired. During this period I learned a lot about PHP as a language itself and how MySQL databases worked.

I'M LABS

Fullstack Developer (2021~2022)

An excellent opportunity in which on different projects I was exposed to several new and different technologies. I made several projects with ViteJs, Next, Laravel/Jetstream, React Native and other technologies.

SIMBIOSE SOCIAL

Fullstack Developer (2022~Present)

The company I currently work for. I'm a "jack of all trades" type developer that creates features from the front-end to the back-end along with database structuring. I work extensively with Laravel, React.js, and MySQL.

NOTABLE PROJECTS

- Lotopower: Lottery tips and simulations platform, made 100% by me in Laravel.
LINK: https://lotopower.com.br

- dumpi-fy: Spotify playlist manager made in PHP.
LINK: https://github.com/dgtyPedro/dumpi-fy

- Simbiose's Platform: Platform that connects companies with NGOs.
LINK: Under Development
